KRONES colclean C 1201

KRONES colclean C 1201 is a highly effective cleaning agent for removing stubborn dirt from the surfaces of machines. In particular, KRONES colclean C 1201 makes it much easier to remove hotmelt residue. To use it, spray the surface to be cleaned with KRONES colclean C 1201, let it react for a short while, and wipe off with a dry cloth.

Advantages

- Outstanding cleaning properties especially for hotmelt soiling
- Gentle cleaning – machine parts and coated surfaces are not attacked
- Spray bottle with adjustable nozzle for accurate application
- Economical thanks to effective cleaning power
- Natural orange terpenes
- Contains no solvents
